

Skil-Care Corporation is a domestic manufacturer and has been developing and designing products for the long-term care industry for over 30 years. The company has a strong design team and works very closely with healthcare professionals to determine which products would be most beneficial to the caregiver and resident. All the products go through a careful review process and are screened by caregivers and tested in the long-term care setting. As of this date 135 original successful designs or products were presented to the industry and these products are highlighted in the catalog/website with the following symbol  Over the years, many of these products have been improved based on extensive feedback from the care-givers. It is a natural process for successful products to be copied by other suppliers but in most cases these companies aren't aware of the product rationale and design details, and leave one or more features out of the copied product. Sometimes a copied product can be purchased for less but in most cases it costs more in the product life since it is inferior in durability, launderability and effectiveness. Also it isn't serviced by the extensive Skil-Care network.

As a manufacturer, Skil-Care does not sell direct and the company offers products through a network of over 400 dealers. Although product selection is often confusing and difficult, with the Skil-Care and dealer representatives any facility can receive assistance. Simply call or email the representative to set up an appointment or to ask a question. **For long-term care institutions and dealers, please refer to the representatives listed on the map below. For home medical care dealers please contact John Cornell at 1-800-431-2972 x222.**
