Purpose

These products are designed to allow the user the opportunity to project the path of the marble. The activity is fun and enhances hand-eye coordination & finger strength as the user guides the marble around the maze. The soft gel feel increases tactile & visual stimulation and reduces boredom.

Easy to Use

Place product on a flat surface and move the marble through the maze by pushing on the gel in front or behind the marble.

Easy Care

The heat-sealed gel maze can be wiped clean with a disinfectant. It should not be laundered.

Caution

Use only as instructed and always under adult supervision. Do not refrigerate, freeze, heat or microwave. Do not puncture this product. Although the gel is not toxic, medical assistance must be invoked if the gel is taken through the mouth. If the product is cracked or damaged, it must be discarded. The gel and vinyl are phthalate compliant but shouldn't be eaten or chewed.

Contains small marble, possible choking hazard.
