

# Multi Compartment Handi-Bag

Reorder #	Description	Size	Wt.	Unit
□914396	Multi Compartment Handi-Bag	18"W x 11"L	.04 lbs	Ea

## PURPOSE

Although there are several bags available, most have few individualized pockets which don't allow one to separate their personal items. Elderly people frequently become anxious when they misplace their personal items and with this bag you could store some of your most frequently needed items (glasses, keys) in the same place.

## USE INSTRUCTIONS

The Handi bag is designed to be placed over the front bar of a walker or to the back of the wheelchair, as shown above, by placing the split rings over the handle grips. If necessary, the split rings can be separated by holding either side of the split and proving side pressure. It is suggested that the glasses be stored in the eye glass pocket and the keys and strap attached to the opposite split ring as shown in illustration 3. The keys may then be placed in the key pocket.

## PARTS LIST

Nylon handi bag, Key ring tie, Two split rings, ID tag

## CARE INSTRUCTIONS

This nylon bag can be cleaned with a mild detergent. It can be laundered at temperatures below 180°F(82°C).

**Caution: If washed, remove all personal items from the pockets, key rings, key holder, keys and name tag.**
