

**Light Box**  
Reorder # 914514

Skil-Care's Light Box features a large 16" x 16" frosted light screen. It allows children and professional artists to use regular paper to trace line drawings, shapes, and patterns. The raised edge around the screen keeps objects from falling off. The Light Box can also be used to backlight translucent gel shapes (see below) that provide visual and tactile stimulation for children and adults. (These are optional accessories that must be purchased separately from the Light Box.)

### **Bulb Replacement**

Skil-Care's Light Box comes with a 120 volt, 22 watt circular fluorescent bulb. Replace bulb by removing each of the four screws in the corners of the back of the Light Box. Do not remove the two center screws.

### **Caution**

When using this or any electrical device, make certain that young children and all diminished capacity users are properly supervised.

**Gel Shapes**  
Reorder # 914518

Five gel shapes in five different colors. Multi-Color glitter stars move inside for visual interest. Helps children with color and shape recognition

**Gel Maze**  
Reorder # 914517

User moves plastic disc through gel maze. A challenging and enjoyable way to improve attention span.

**Gel Tic-Tac-Toe**  
Reorder # 914516

A fun way to fine-tune coordination. Allows two people to participate in activity.

**Gel X Pad**  
Reorder # 914515

Children can finger-trace across the surface to develop pre-handwriting skills.

**All gel accessories may be used with or without the Light Box. These accessories are sealed in durable clear vinyl and clean easily with spray-and-wipe cleanser.**
